

LEUREN MORET

International Expert
on Depleted Uranium (DU)

Sunday, Jan. 11, 3-5

Friends Meeting House, 4312 SE Stark Street

Leuren Moret

Internationally recognized depleted-uranium (DU) expert and geoscientist Leuren Moret will be speaking in Portland on Sunday, January 11, 3-5 at Portland's Friends Meeting House, 4312 SE Stark Street.

\$10 at the Door **Parking:** LEFT after 47th St. light in church lot.

The January 11 presentation will be on DU's air-borne health hazards and its genetic destruction to offspring of those exposed to DU-coated weaponry or DU residue in the Gulf, Kosovo, Iraq, and Afghanistan wars. DU particles involve easy passage from the infected person to friends, family, work cohorts, et al. by any physical contact. Cancer and diabetes are the suspected results of DU exposure.

Moret also has agreed to give extra talks for nominal fees Monday – Tuesday to groups—churches, peace groups, environmental or sustainability groups, health-care groups, etc. For high schools and universities/colleges, she will speak without charge.
